TO CORRESPONDENTS

I take pleasure in presenting herewith my twenty-fifth annual catalogue and price list.

It has been my endeavor to list, as much as possible, only the very best and most satisfactory of both Fruit and Ornamental Trees and Plants. Whatever I am not able to grow on my own grounds, I procure from the most reliable Nurseries. My Nursery is located between Fifth Avenue and Center Street, one block north and two blocks west from the Telephone Building, corner Fourth and H Streets, San Rafael.

I do not give lengthy descriptions of plants, as it is far more satisfactory to see the plants actually growing in the nursery. I have specimen plants of a number of varieties of trees and shrubs; therefore invite my customers and friends to visit the nursery whenever convenient.

Business hours from 8 a. m. to 5 p. m., except Sundays.

I warrant all trees and plants to be healthy, and true to label, but having no control over them after delivery, I do not GUARANTEE them to live and thrive, nor will I replace them, except any tree or plant should prove untrue to name; but in no case will I be liable for any sum greater than the original purchase price.

My customers are requested to notify me immediately of any error that may have occurred in filling their order, so that the same may be rectified, as I desire to give satisfaction to all who favor me with their order.

All orders delivered free in San Rafael and surrounding towns; a small charge for packing, to cover cost of material, will be made for all orders shipped by express or freight. All articles are at the risk of the purchaser, after being shipped.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference. All bills payable first of the month.

NOMENCLATURE

All plant names, both botanical and common, have been revised to conform with 1928 edition of "Standardized Plant Names" if listed in that book. The only exceptions are a few uncommon items and novelties which that work does not include. This standardized nomenclature should unquestionably be followed by everyone from now on.

Better Housing Program

National Housing Act

The Better Housing Program of the United States Government enables property owners to finance repairs and improvements at low cost. This includes **Garden Improvements** of a permanent character by:

Landscaping the surroundings of your home;

Resowing your old lawn or planting a new one;

Planting permanent trees and shrubs;

Making an “**Outdoor Living Room**” out of your back yard.

Full information and estimates as to cost and plant material gladly submitted.

To encourage the planting of Trees and Shrubs,
we offer from our surplus stock---

CONIFERS

Coniferous Trees are the grandest trees in existence. A good many of them are natives of the Pacific Coast, and therefore at home in our climate. Though the more expensive varieties are of rather slow growth, until well established in the ground, they will grow into the finest specimen trees for the lawn in a few years. Prices are for small and medium-sized plants. Quotations for larger plants on application.

Planting Season:

Field-grown plants from October to March. Pot-grown and boxed plants from September to June.

EVERGREEN TREES and SHRUBS

Broad-leaved Evergreens vary in size from the largest trees to the smallest shrubs; unlike the coniferous Evergreens, whose flowers are insignificant, most of these excel in brilliancy and floriferousness, others through their shining berries and foliage. These plants give our California garden and parks their distinctive feature.

MAGNOLIA SOULANGEANA

DECIDUOUS TREES and SHRUBS

The best street and avenue trees are decidedly deciduous trees; they will give the necessary shade in summer and admit sunshine in winter. In this class are also the most gorgeous spring and summer blooming shrubs. Deciduous weeping trees are beautiful specimen trees for the lawn.

Prices are for field-grown plants, except where noted.

Planting Season:

November to March, after leaves commence to fall and before they commence to bud in spring.

FLOWERING FRUIT TREES

Among the flowering trees the flowering types of our fruit trees are undoubtedly the most popular. Beginning with the flowering Almonds, Apricots and Plums in February and March, followed by the gorgeous double flowers of the Peaches and numerous types of Crabapples in April, and finishing up in May and early June with a splendid display of the Japanese Cherries, will mean blossom time at home.

Planting Season:

January to March, or earlier, if stock is available, and the weather permits.

Roses

The "Queen of Flowers" gives best results when planted in a sunny location and in a fairly heavy sediment soil. Be sure that the plants are set deep enough, at least one or two inches deeper, than where the bud has been inserted. Prune rather severe during the winter months, December to February, except the spring blooming climbing Roses like Banksias, Cherokees and Ramblers. Prune these roses right after the blooming season is over, never in the fall.

Budded Roses are more vigorous and give better results than stock grown on its own roots, with the exception of a few climbing and strong growing varieties.

Planting Season:

January to March, also in the late fall, if stock is available.

PRICES

SPECIAL COLLECTION

My own selection, including some of the best varieties:
12 different varieties, one each \$4.00

A new Miniature Decorative Dahlia

JEWELTJE (Little Jewel)

This little Dahlia of Holland origin is the outstanding novelty of recent years; not over 3 inches in diameter; of perfect form; a continuous bloomer, and the color, a clear delicate pink. The finest little Dahlia for cutting and florist work 35c

POMPON DAHLIAS

These produce small, compact flowers of perfect form and free blooming qualities. They are unequalled for cutting and garden display. Named varieties 25c each
\$2.50 per doz.

DAHLIA IMPERIALIS—

The Mexican Tree Dahlia grows to a height from 8 to 10 feet, foliage very ornamental; the light pink, bell-shaped flowers appear in November 60c each

WATER LILIES

The culture of Waterlilies is so simple that it might almost be said that "they just grow themselves." Their modest requirements are sun, water and rich soil. In deciding on a place for a natural water-garden, one is naturally led to select a low spot.

It is not very difficult to construct an artificial pool. Any location that is available would be satisfactory, provided it is exposed to the full sun.

An artificial pool should be made as large as possible, and 2 feet deep. In California it is advisable to build the bottom and side walls of 6-inch water tight concrete. Make an artificial pool as natural as possible and avoid stern lines and too apparent masonry. A generous planting of moisture-loving plants around the edge of the pool or pond will furnish an added charm to the plants in the pool itself.

One foot of water over the soil is the most desirable depth in artificial pools. Some will thrive in shallower water, but few will stand a depth exceeding 2 or 3 feet. A continuous flow of water tends to keep the temperature in the pool low and must be avoided. After the pool is once filled it is only necessary to replenish that which evaporates.

A few Goldfish will serve to destroy the wrigglers that hatch into mosquitos and larvae of other insects.

NYMPHAEAS

AURORA—

Flowers are rosy-yellow, turning to a red-orange and deep red, as they mature \$1.50 each

COMANCHE—

Rich apricot, changing to a deep coppery bronze a sunset color \$2.50 each

GLADSTONE—

The finest white Water Lily in cultivation \$1.50 each

JAMES BRYDON—

Rosy red, cup-shaped blossoms, free grower \$2.50 each

MARLIAC YELLOW—

A vigorous grower; bright canary yellow \$1.50 each

MASANIELLO—

A charming pink variety, quite distinct \$1.75 each

PAUL HARIOT—

A magnificent variety, distinctive color: canary yellow, shaded with pink, which suffuses the flower entirely as it grows older. A good grower \$2.00 each

ROSE-AREY—

Colored, a clear cerise pink; sweetly scented .. \$1.50 each

SUNRISE—

Very large sulphur yellow flowers, leaves mottled brown \$2.50 each

W. B. SHAW—

Wide open flowers of a rich rose pink, very fragrant \$2.00 each

TROPICAL WATER LILIES

Sooner or later every owner of a pool wants to grow a few tropical water lilies. Considering their intensive blooming season, the quality of their flowers, on strong stems above the water, they are really the aristocrats of the lily pool. Young plants have to be started in the greenhouse, and should not be planted until the middle of May. It is best to set out new plants every year. Order early. Prices, according to variety, from \$1.50 up.

NELUMBIUM NUCIFERA

The most strikingly beautiful plant in the aquatic field is the Lotus or Nelumbium. The large concave leaves, resembling green shields, are borne on stout stems high above the water. The flowers are of exquisite rose pink, like giant Tulips, changing to creamy tints when fully open.

The brown seed-pods, which remain long after the flower is gone, are very artistic.

The Nelumbiums are rampant growers and heavy feeders and must be supplied with a very rich soil.

Tubers ready in May \$2.00 each

IRIS

Iris germanica, commonly called German Iris, Flag-Lilies or Fleur de Lis, are amongst the most desirable and easiest grown of our spring flowering plants. The flowers fairly out-rival the orchids in delicacy of structure and wide range of coloring. They are particularly adapted to our California climate, if planted in a well-drained sunny location, requiring very little water during the summer. Avoid planting too deep and fresh manure.

Planting Season:

September-November, or later, if the ground is not too wet.

Price for strong divisions: 20 cents each, \$2.00 per doz.

ALCAZAR—

Standards; light bluish violet with bronze reflections; Falls; red violet, bronze-veined throat.

BALLERINE—

Large, fragrant, violet blue, one of the very finest Pallida type.

GLOIRE DE HILLEGOM—

Lavender, shaded blue, very fragrant: one of the best Pallida varieties.

MOTHER OF PEARL—

Standards and Falls, pale blue lavender, with a faint creamy undertone.

PRINCESSE BEATRICE—

Standard and Falls, a delicate blue, rated as one of the best Iris.

IRIS-KOENIG—

Standards, clear lemon; Falls, deep satiny brown, golden yellow border.

ISOLENE—

Pale lavender, lower petals light purple overlaid with brown, yellow beard; very distinct.

LORELEY—

Standards, pale sulphur-yellow; Falls, deep ultra marine blue, veined creamy white yellow border.

LOHENGRIN—

A delicate shade of pale lavender blue, very large flowers.

NIBELUNGEN—

Standards, olive green suffused with yellow; Falls, deep purple, edged creamy white.

NOTHUNG—

Standards, light olive colored; Falls, delicate lilac, golden yellow beard.

PRINCESSE VICTORIA LUISE—

Standards, sulphur yellow; Falls rich plum color with creamy edges.

PROSPERA—

Standards of rich violet rose; falls velvety violet purple orange beard.

RHEIN-NIXE—

Standards, pure white; Falls, deep violet blue, margined white.

SEMINOLE—

Standards, lilac red; Falls, velvety crimson, orange beard.

HARDY PERENNIALS

Herbaceous plants are indispensable for filling in and planting amongst shrubbery, in the rock gardens, for the old-fashioned perennial border, etc. Most varieties, after once planted, will live and bloom without much attention, for many years. Prices are for field-grown, potted or transplanted seedling plants.

Planting Season:

October to March, as early as possible, whenever the soil is in good condition.

SUMMER FLOWERING BEDDING PLANTS

These plants are mostly Annuals, raised every year from seed or cutting, several are of a hardier nature, and under favorable conditions will stand our California winters. Prices are for plants, grown in boxes or 2-inch pots.

Planting Season:

April, May and June, except for the winter and early spring bloomers, like Pansies, Winter Stocks, Wallflowers, etc.; plant those in October and November.
